Eric Pending Permit Actions 11-29-17.pdf

Gail,

Attached is the list from MERLIN of permit actions assigned to me. I discussed this with Ida and my current plan is continue working on the 7 syn minor NSR permit actions after December 10th. The 6 Anadarko actions should be fairly easy to issue and the Circle Ridge action may be withdrawn depending on the outcome of an analysis I'm working on to determine if equipment at the facility is inherent to the process vs. a control device.

The two Part 71 actions (Steamboat Butte C1/C3 and E-5 Tank Batteries) will need to be reassigned to someone else. Both of these facilities have pending syn minor NSR permits that need to be issued prior to the Part 71 permit to provide enforceable requirements for the flares at these facilities.

Eric
